

EV1's and EVNT3's are packed with a Mounting Screw Kit Consisting of 6 each of Metal Screws and Plastic Anchors

### Specs of the Screws

- #18-8 Metal Screws
- Length: 1-1/2"
- Head Type: Phillips, Round,
- Head Size: Ø 0.384" and Height at 0.102"

With the screw length at 1-1/2" and plastic anchor expandable to 1/4", each screw/anchor supports a weight of 40 lbs, and 2 screws/anchors can stand a weight of 80 lbs

### Specs of the Anchors

- Ribbed Plastic Anchors
- Sizes: #8-10-12 X 1-1/4"
- Diameter: 1/4"

The extra 2 screws/anchors at the bottom are used to stabilize and support the top 2 screws and anchors.

### How to Mount the Screws and Anchors on the Wall

- Refer to the 2<sup>nd</sup> page to choose the right type and size of the drill bit to drill a hole on the wall to mount the anchors
- Slide the expansion anchor into the hole.
- If the hole is too small, try a bigger drill bit.
- Use a rubber mallet to help push in the anchor until the anchor sits flush against the surface of the wall.
- Use a Phillips Head screw driver to screw in from the anchor.

### Special notes:

UMC - End user should consult and purchase the proper screws from the local hardware store.

Use 0.25in Drill Bit for Anchor Holes

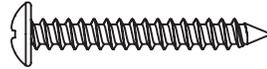

Use Yellow Anchor for Drywall  
Each Anchor Supports 20lb

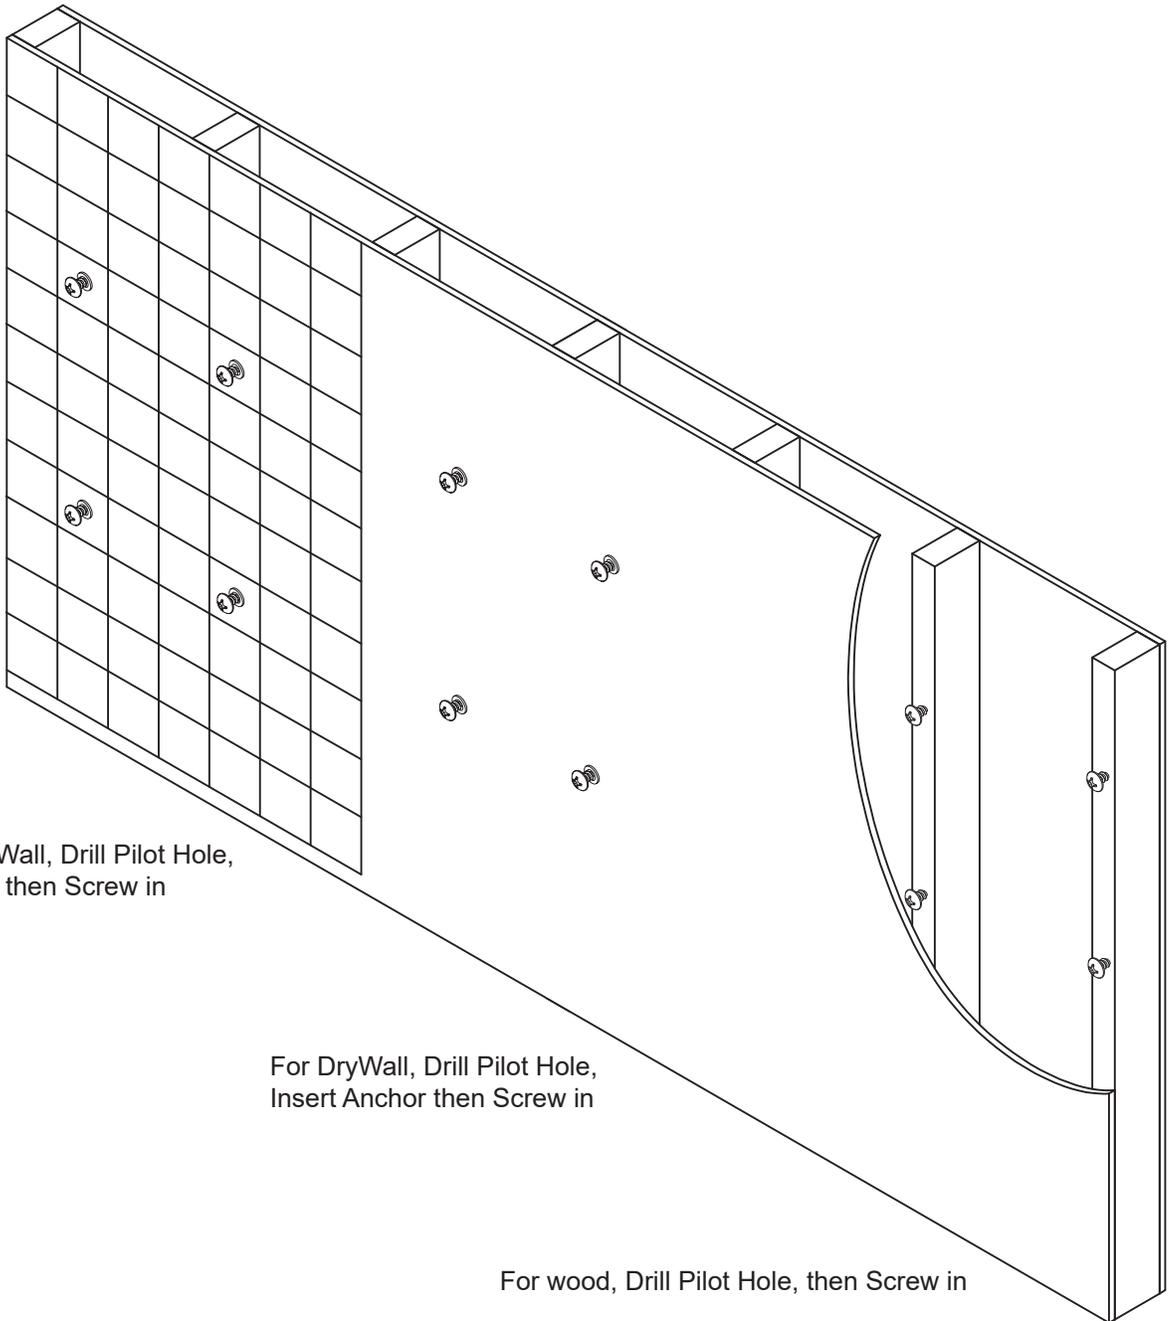

Use 0.125in Drill Bit for Wood

Use 0.25in Ceramic Drill Bit for Tiles

Use Screw for Wood and Anchors

For Ceramic Wall, Drill Pilot Hole,  
Insert Anchor then Screw in

For DryWall, Drill Pilot Hole,  
Insert Anchor then Screw in

For wood, Drill Pilot Hole, then Screw in
