

# Shiny Glass Cloths

16" x 16" • 44 gram • 270 GSM

The smooth texture of these microfiber cloths makes them perfect for cleaning glass and other surfaces that deserve a streak-free shine. This cloth easily releases particles whenever it is rinsed, and it also reduces the amount of chemicals needed for cleaning, so it improves efficiency and saves money in the long run.

We package our wholesale microfiber cloths by the dozen in point-of-sale packaging, which makes them a great choice for commercial and JanSan partners. You can order them by the case, with 15 dozen per case, so it is easy to maintain a healthy stock of these janitorial supplies.

Studies continue to show that microfiber can help eliminate up to 94% of bacteria from surfaces, so these cloths actually go beyond cleaning and help to disinfect a surface.
