**Face Coverings Just For Kids:
ProWorks® ProKids™ Children's Disposable Face Masks**
Designed for smaller faces, comfortable, and allergen-free

CLEVELAND—March 2, 2022—Protecting children from coronavirus and other illness remains a major concern for parents and health professionals. Facilities requiring or recommending mask use, including schools, dental offices, healthcare facilities, and other public spaces, have an obligation* to provide masks to those patrons who need them. This is particularly true of students (including on buses) who forget to bring their masks or whose families are unable to afford them.

Hospesco Brands Group, which comprises Acute Care, Adenna®, HOSPECO®, Nilodor®, and other popular brands, offers bulk availability of [ProWorks® ProKids™ Children's Disposable Face Masks](#). The masks are designed for smaller faces, fitting snugly over the child's nose and mouth without any gaps.

In some instances, face coverings may be essential for children to safely return to school or childcare; receive care at dental and medical clinics; or enjoy fun with family and friends at amusement parks, children's event centers or other group settings. In addition to protecting the child, the use of face coverings significantly reduces the spread of coronavirus and other viruses to other children and adults. ProKids Children's Disposable Face Masks are comfortable to encourage use and easy to put on.

ProKids Children's Disposable Face Masks feature soft, comfortable elastic ear loops (no latex!) and the integral nose clip helps create an allergen-free, custom fit. Blue side faces out, to help kids easily understand how to wear it properly. Masks are three-ply fluid resistant, with an inner-, filter-, and outer-layer made of polypropylene.

ProKids Children's Disposable Face Masks meet ASTM F2100-11 Level 1 standard. They are suitable for kids ages 4 to 12.

About Hospesco Brands Group

Wherever people go to work, shop, dine, learn, or seek medical care, their lives are touched daily by Hospesco Brands Group. The company, comprising Acute Care Pharmaceutical™, Adenna®, HOSPECO®, Nilodor® and other popular brands, makes products that protect, sanitize, clean, and provide care and comfort to millions around the globe. Solutions for and barriers against germs, bacteria, and harmful substances are vital weapons in the battle for public health and safety. Hospesco Brands Group products make workplaces, businesses, schools, and other public facilities safer and more comfortable through categories such as personal protective equipment (PPE), cleaning equipment and supplies, facility and floor care, odor control, restroom comfort, and menstrual care.
