HOSPECO® Introduces ProWorks® Ultra Thin Nitrile Gloves

All the Advantages of Nitrile in a Thin, Highly Tactile Glove

CLEVELAND—July 12, 2018—Employees who work with their hands deserve protection from skin irritation, and, of no less importance, handling many products themselves such as food, electronics, pharmaceuticals, highly engineered industrial goods call for protection from contamination caused by human touch. These coexisting needs call for a glove barrier, but most gloves greatly reduce tactile sensitivity. Powder-free ProWorks® Ultra Thin Nitrile Gloves from HOSPECO®, for the first time ever, combine the superior strength and second-skin fit of nitrile with the thin-gauge barrier typically found in loose-fitting vinyl gloves.

ProWorks Ultra Thin Nitrile Gloves are ideal for food handlers and food processors and for light-industrial tasks or any job for which the wearer needs to feel their way through the task. Representing the industry's best-in-class sensitivity, these innovative gloves provide the protection typical of nitrile gloves, including resisting vegetable oils, motor oils, grease, and many chemicals. Nitrile is a synthetic polymer with many of the same properties as natural rubber latex, yet it is free of any latex proteins that can cause skin sensitivity and allergic reactions.

HOSPECO's ProWorks® Ultra Thin Nitrile Gloves are comparable in thickness to loose-fitting disposable vinyl gloves. But the comparison stops there. Nitrile delivers performance and durability — and even puncture resistance — that vinyl can't. Nitrile is three times more puncture resistant than a comparable thickness of latex, thus providing dependable protection for the user.

Because of the gloves' translucent design and light weight, it's easy for wearers to forget they're wearing them at all. ProWorks® Ultra Thin Nitrile Gloves provide excellent fit and feel, and the beaded cuff eases donning. Textured fingertips assist with grip but don't interfere with the superior tactile sensitivity.

ProWorks Ultra Thin Nitrile Gloves have a tensile strength of 14 MPa, and can be elongated 400% before breaking, even after aging. This flexible, resilient hand protection is just one of HOSPECO's many ProWorks disposable hand protection solutions.

About HOSPECO

Founded in 1919, HOSPECO® is a leading manufacturer of cleaning and protection products serving the "away from home" marketplace made up of Foodservice, Janitorial/Office Supply, Healthcare, and Hospitality. Our Bundle of 8 covers personal care, toilet seat covers, air care, wipers, rags, microfiber, sorbents, and gloves/safety, all of which are sold by more than 1,200 independent distributors. Our brands include Taskbrand® disposable wipers, SaniWorks® foodservice towels, ProWorks® disposable gloves, MicroWorks® microfiber towels, and Sphergo® flat surface cleaning systems. HOSPECO's Bundle of 8 is a complete line; in each of our 8 product categories, we provide quality, breadth of line,

innovation, and category expertise. HOSPECO is proud to be a charter member of ISSA (International Sanitary Supply Association). For more information, contact HOSPECO at 26301 Curtiss Wright Parkway, Suite 200, Cleveland, OH 44143. Phone: 800.321.9832. Fax: 800.362.0073. Web: www.hospeco.com.
