## First and Only Hands-Free Toilet Seat Cover System Now Even Better

*Evogen® High Capacity No-Touch Toilet Seat Cover Dispenser  
holds up to 250 seat covers*

CLEVELAND—January 26, 2021—Visitors to public spaces expect hands-free technology in the restroom. The first and only hands-free toilet seat cover system is now even better with a capacity that is more than doubled. The patent-pending [Evogen® High Capacity No-Touch Toilet Seat Cover Dispenser \(EVNT1-HCW\)](#) from [Hospeco Brands Group](#) now holds up to 250 seat covers, accommodating two [Evogen® Toilet Seat Cover refill packs \(EVNT-3125\)](#). Users simply wave their hand near the clearly marked sensor on the face of the dispenser to receive a fresh, ready-to-use, individual seat cover.

This increased capacity translates into costs savings for high-traffic facilities by cutting down on service time for maintenance staff. Other time-saving features built into the unit include a flashing red light on the front of the dispenser that indicates when refilling is needed, which is achieved via easy front loading. Further, an easy-read power indicator light near the battery housing alerts staff when it is time to replace the four AA batteries (green: full power; orange: half power; red: replace). Finally, the automated, single-dispense mechanism helps ensure less waste than manual-pull dispensers.

Ninety percent of people wouldn't use a public toilet without making sure that the toilet seat is clean and free from possible disease-transferring germs. Not to mention the pandemic era has obliterated the clean-enough standard in the eyes of the public. More than ever, cleanliness and barrier protection is a very personal measure of a facility and its brand. It's a simple fact: customers prefer to touch as few surfaces as possible in the restroom.

Evogen® High Capacity No-Touch Toilet Seat Cover Dispenser is fully contained, with no unhygienic pre-displaying of product. All seat covers are kept clean inside the dispenser. Then, with a wave of the hand, a single cover is dispensed automatically. And the seat cover is presented from the dispenser in full and ready to use—not folded and with no tabs to tear. The single-sheet and ready-to-use presentation of toilet seat covers answers a long-sought design change—eliminating waste associated with users quickly grabbing multiple seat covers or ripping them as they dispense from a traditional half-fold dispenser.

By design, the seat covers inside are tailor made for true one-at-a-time, automated dispensing, using the highest-quality flushable paper for a superior sanitary barrier.

The patent-pending [Evogen® High Capacity No-Touch Toilet Seat Cover Dispenser \(EVNT1-HCW\)](#) from [Hospeco Brands Group](#) is a proprietary dispenser that will only work with the Evogen® Toilet Seat Cover refill packs (HS-3125).

### **About Hospeco Brands Group**

Wherever people go to work, shop, dine, learn, or seek medical care, their lives are touched daily by Hospeco Brands Group. The company makes products that protect, sanitize, clean, and provide care and comfort to millions around the globe. Solutions for and barriers against germs, bacteria, and harmful substances are vital weapons in the battle for public health and safety. Hospeco Brands Group products make workplaces, businesses, schools, and other public facilities safer and more comfortable through categories such as personal protective equipment (PPE), cleaning equipment and supplies, facility and floor care, odor control, restroom comfort, and menstrual care.
