Keep Dumpsters Clean and Deodorized *Nilodor Waste Container and Dumpster System takes the guesswork out of clean*

CLEVELAND—August 16, 2022—The customer experience starts in the parking lot where, too often, garbage and grease corals dominate a landscape where they should be invisible. Don't just mask issues, eliminate them.

Hospeco Brands Group, which comprises Acute Care, Adenna®, HOSPECO®, Nilodor®, and other popular brands, offers the most complete weapon in this fight, the [Nilodor Waste Container and Dumpster System](#), a product mix developed to

keep dumpsters and trash cans, trash rooms, loading docks, and other high-odor areas deodorized and clean. An important distinction between the Nilodor family of products compared to other odor-fighting tools is that Nilodor products do not mask odors; rather, they eliminate them.

The lineup starts with [Chute and Dumpster Wash All-Purpose Cleaner](#) and [Chute & Dumpster Wash PLUS Bio-Enzymatic Cleaner](#), with [Nilodew Deodorizing Granules](#) providing maintenance between cleanings.

Chute & Dumpster Wash is a safe, non-toxic, and environmentally friendly all-purpose cleaner with odor-neutralizing power. Available in a 1-gallon concentrate or, for an easier application, in a special applicator spray system that perfectly dilutes and releases a ready-to-use cleaner. Simply connect to a water hose, turn the dial to "solution spray," and begin applying to the inside and outside of dumpsters to eliminate dirt and grease buildup and severe odors. To rinse the area after cleaning, simply turn the dial to "water" and rinse.

For cleaning that's a step beyond, there's Chute & Dumpster Wash PLUS. This bio-enzymatic cleaner is formulated with safe, grease-loving, enzyme-forming bacteria and citrus oils. It works just like regular Chute & Dumpster Wash by attaching to a hose. Severe odors may require agitation with a brush or broom.

Both products are also suitable for compactors, trash chutes, outdoor eating areas, recycling areas, and any other applications for which organic matter results in foul odors.

Between cleanings, pour in one to two pounds of Nilodew Dumpster Deodorizer, an easy-to-use, clay-based, granular deodorizer that contains a natural odor absorbent, a proprietary odor neutralizer, and

Citronella oil. Nilodew is used to control and neutralize foul odors in and around dumpsters, compactors, trash cans, and recycling areas around the clock, for up to 7 days.

For sewers, elevator shafts, water treatment facilities, and anywhere an abundance of odor needs to be neutralized, there's [Super N® Deodorizing Super Sock](#). As a safer alternative to hazardous parablocks, Super Sock contains concentrated Nilodor odor neutralizer for effective, long-lasting odor control that fights odors 24/7 for 30 days. Also use it for fire restoration.

About Hospeco Brands Group

Wherever people go to work, shop, dine, learn, or seek medical care, their lives are touched daily by Hospeco Brands Group. The company, comprising Acute Care Pharmaceutical™, Adenna®, HOSPECO®, Nilodor® and other popular brands, makes products that protect, sanitize, clean, and provide care and comfort to millions around the globe.
